

MATYSIAK CAMERA

MATYSIAK CAMERA specializes in providing producers, directors, and cinematographers detailed and ongoing support from prep to post. Our partners range from local production companies here in the region to International cinematographer guild members around the globe. We grew up shooting film, we learned how to run and gun and we take comfort in our confidence in providing cinematographers and directors with the latest technology. Our focus is on providing camera systems that are versatile, simple and agile to help achieve your vision without compromise.
